

Keep the conversation with the work.

Encrypted end-to-end FedRAMP Moderate GCC High CMMC Ready Suite™ CUI Friendly

Exostar's Secure Messaging™ brings chat-style messaging and file exchange together in one place with end-to-end encryption for everyday sensitive conversations.

01**Discuss the work**

Discuss sensitive work with authorized people inside or outside your organization.

02**Find its supporting files**

Keep shared files connected to the messages that give them context.

CUI MARKING**Mark CUI before sending**

Apply CUI markings to attachments so recipients recognize information that needs protected handling.

**Select a file. Return to its message.**

Select a file in the Files panel to highlight the message that shared it. Read why it was sent and what your recipient needs.

YOU**Ask about a drawing**

"Does this revision change the tolerance?"

Bracket-RevC.pdf

CUI**YOUR RECIPIENT****Answer in the same thread**

"No — ±0.05 mm holds. See the note on sheet 2."

✓ Reply stays with the file

Choose the tool for the task

Use both when you need both: dedicated direct messaging alongside your document workspace in Exostar's Managed on Microsoft 365™.

DISCUSS AND EXCHANGE

Secure Messaging™

Secure chat-style messaging and file exchange.

EDIT TOGETHER ONLINE

Exostar's Managed on Microsoft 365™

Work together on shared documents.

Know where your download goes

The destination depends on where you run the browser.

INSIDE MSD

Inside Managed Secure Desktop™

Download and open sensitive files within your managed environment, supporting your CUI protection requirements.

OUTSIDE MSD

Downloading to your own computer

Make sure your device and save location have the protections the information requires.

Viewing a file requires a download. Outside MSD, downloaded copies rely on your organization's safeguards; your organization remains responsible for its assigned controls and compliance activities.

Keep work moving through change

Hand over an active conversation with its messages and attachments intact. If a conversation loses its owner, a Sponsor Admin can assign a replacement.

PREVIOUS EMPLOYEE

Betty

Hands the conversation to John — no replacement thread, nothing resent.

NEW EMPLOYEE

John

Picks up the same conversation — recipients and context already there.

Exostar Secure Messaging requires CMMC Ready Suite™ and is subject to availability and agreement terms. © 2026 Exostar LLC. All rights reserved.

TALK TO SALES

Keep your recipients and their context connected

Secure Messaging™ is included in Exostar's CMMC Ready Suite™. Find the right fit for your conversations and shared document work.
